

CV - Jassim Abdulrahman Alanbari

Third-year computer science student and Qatari founder

Jassim Abdulrahman Alanbari

Doha, Qatar

Address: Zone 56, Street 569, Building 35, Qatar

Email: JASSIMPROPVP@gmail.com

Phone: +974 77944472

Nationality: Qatari

Profile

Third-year Bachelor in Computer Science student at Qatar University and Qatari founder working on AI-assisted digital workflows for contractor matching, accessibility improvements, and green retrofit coordination. Founder of MimaarLink Digital Retail Platform, a Qatar-registered company focused on helping project owners connect with suitable contractors and structure project requests clearly.

Interests include artificial intelligence, smart cities, accessibility, sustainability, entrepreneurship, and practical technology adoption in Qatar.

Education

Qatar University

Bachelor in Computer Science, Year 3

Expected graduation evidence in local education records: 2028

Founder Experience

Founder - MimaarLink Digital Retail Platform

Qatar | 2026 - Present

Founded a Qatar-registered digital retail/intermediation platform focused on contractor matching and structured project workflows.

Developed the concept for MimaarLink Access, an accessibility-focused workflow that helps families and people with disabilities describe home modification needs and generate contractor-ready scopes.

Developed the concept for MimaarLink Green Retrofit, a workflow for energy, water, lighting, cooling, and sustainability-related retrofit requests.

Worked on positioning the platform around AI-assisted project intake, contractor classification, bid comparison, and local service matching.

Selected Projects

U.S.-Qatar AI & Green Innovation Sprint

Grant proposal concept, 2026

Designed a public-facing innovation program concept for Qatar-based students, entrepreneurs, and private-sector stakeholders.

Program focus: U.S. technology tools, responsible AI, green innovation, open information, and startup pathways.

Proposed activities include workshops, a 48-hour innovation sprint, demo day, and final report.

AI Home Retrofit Scanner

Invention concept, 2026

Designed an invention concept for Stars of Science / Young Inventors-style applications.

Concept uses phone photos/videos and guided questions to identify accessibility, elderly-safety, and green retrofit needs in homes.

Output is a contractor-ready scope and quote-comparison checklist.

MimaarLink Access

Accessibility technology concept, 2026

Developed a digital accessibility workflow concept that helps users request ramps, safer bathrooms, handrails, lighting improvements, visual alerts, access paths, and smart-home-ready changes.

Uses AI-assisted intake to classify user needs, identify missing details, and prepare clearer contractor requests.

Skills

Computer science studies.

AI-assisted product concept design.

Startup and digital platform planning.

Contractor/project workflow analysis.

Accessibility and green retrofit problem framing.

Grant proposal and innovation program planning.

Arabic/English communication.

Current Application Activity

Mada Innovation Award 2026: MimaarLink Access application prepared, final submission pending.

U.S. Embassy Doha OFOP0002777: individual grant proposal prepared.

Stars of Science Season 18: AI Home Retrofit Scanner application draft prepared.
